This is used to absorb the axialdirection expansion and contraction of a pipeline that occurs according to temperature changes. Since it is an internal pressure type, it is buckling—free and ensures smooth expansion/contraction.

Features

- · Absorb the expansion & contraction of pipelines by temperature changes.
- Outstanding level of corrosion resistance: Parts materials come into contact with fluid are made of stainless steel.
- · Outer tube has been used to prevent damage to the bellows from impact..

Specitications

Туре		YBJ-4S	YBJ-4W			
Structure		Single type	Double type			
Applicable fluid		Cold/hot water, Oil, Air, Steam				
Applicable pressure		Maximum 1,0MPa				
Fluid temperature		220°C below				
Expansion/	contraction length	35mm	70mm			
End	connection	KS D 3507 Dimensions-based socket-welded type				
	BELLOWS, Inner tube	STS				
Materials	Outer tube	SPP				
	SOCKET	SPP				
Hydraulic test pressure		1,5MPa				

 $[\]blacktriangleright$ The fixing bolt should be loosened after the hydro-pressure test,
